

# CANCER SCIENCE INSTITUTE OF SINGAPORE IN THE SPOTLIGHT

ISSUE 61 | FEB 2019

## Understanding the Cancer Stem Cell Phenotype: A Step Forward in the Therapeutic Management of Cancer. (*Biochem Pharmacol*, Jan 2019)

This review paper led by Dr Andrea Wong and her team examined the literature on the involvement of key signalling pathways in the appearance of cancer cells with stem cells-like characteristics. Besides featuring current therapeutic strategies, they also discussed the approaches aiming to target cancer stem cells specifically.

## 2018 Year in Review: Research Highlights

From identifying candidate targets for treatments of Glioblastoma (GBM) to developing a computational platform to facilitate drug combination design, 2018 has been an exciting year for the cancer research field. As we move into the new year, let us have a look back on the notable research publications of 2018.

## CSI Research Fellow Nominated to Attend Global Young Scientists' Summit

CSI Research Fellow, Dr Xianning Lai was privileged to be nominated to attend the Global Young Scientists' Summit (GYSS) @ one-north. She had the opportunity to meet and discuss with eminent international scientists. Through five day event, she was tremendously inspired and motivated.

## UPCOMING EVENTS

CSI Seminar  
Simón Méndez-Ferrer  
5 Mar 2019

CSI Seminar  
Yoshiaki Kubota  
8 Mar 2019

CSI Seminar  
Ichiro Taniuchi  
21 Mar 2019

## CSI Annual Report 2018

The CSI Annual Report 2018 is now available for viewing! Click [here](#) to read more about the institute's developments, achievements and activities over the past year.
