

### World Cancer Day 2015 – Not beyond us

CSI supports the global campaign to unite the world's population in the fight against cancer this 4th February. Find out more as our staff share their personal thoughts and hopes for the future, and how you can play your part.

**29 January 2015**

### Aberrant splicing of U12-type introns is the hallmark of ZRSR2 mutant myelodysplastic syndrome (Nat Commun, Jan 2015)

Specific role of *ZRSR2* in gene editing identified, and irregular gene editing proposed as a hallmark indicator of *ZRSR2* mutations in myelodysplastic syndrome.

**22 January 2015**

### Joint CSI-ENS computational systems biology workshop

This 1-day course was a joint collaborative effort by the Cancer Science Institute of Singapore, Ecole Normale Supérieure de Paris (ENS), and the Department of Biological Sciences (DBS) in NUS.

**22 January 2015**

### Feasibility of low-throughput next generation sequencing for germline DNA screening (Clin Chem, Dec 2014)

Low-throughput NGS can be a cost-efficient and reliable approach for screening germline variants; however, its clinical utility is subject to the quality of annotation of clinically relevant variants.
